THE UNIVERSITY.

The University of Arizona is located at Tucson and is an institution that should receive recognition from parents who would like to see their sons adopt a calling that would make them most use ful and practical members of society, and assume a position of scientific prominence in a field of so many opportunities as are afforded by a Territory resplendently rich in its crudity of treasure scope and agricultural possibilities. The university has able talent in the corps of its professors of different branches and the provisions for the accommodation of students are such that must

The president has vetoed the senate bill giving concurrent jurisdiction to the district courts of the United States and to the court of claims for land patents under any law or grant of the United States. The president in his message save:

It is quite doubtful, under the rolings of the supreme court, whether the courts now provided by law for the Territories are "district courts of the United States" within the meaning of this bill. The effect of this legislation would, if they were held not to be such, be that as to all suits relating to lands in the Territories of New Mexico, Arizona Utah and Oklahoma, no other forum is Washington. In this state of the case a settler, or one who has taken a mineral claim in any one of these territories, would be subject to be brought to the city of Washington for the trial of his

Not only is this true, but the court of claims was established for the trial of cases between individuals and corporations on the one side and the United States on the other, and, so far as I re call, wholly for the trial of money claims. There are no adequate provisions of law if any at all, for conducting these suits between individuals contesting private rights.

Again, the bill is so indefinite in its provisions that it cannot be told, I think, what function, if any, remains to be discharged by the general land offloe,-Silver Belt.

"The Rage of Incubation." There is once more sympathy and agreement between the free traders of England and the tariff reform party of this country, and two things have united to bring the oneness of the twain conspicuously out, namely, the late speech of Salisbury at Hustings and the act to grant American register to two British built ships owned by American citizens. The acts are not really correlated, though perhaps each involves a similar principle. Lord Salisbury's speech has caused consternation in the free trade wigwam here. The way the Cobdenites take it reminds one of the bluster of a setting ben, and is probably referable to the same cause-the rage of incubation. The chief free trade organ in this country, the New York Times, gravely sounds a warning to protectionists that reads like something from Little Peddlington.-Philadelphia North Ameri-
